

Enterprise Agile

High Velocity Product Development

Over **100** team transitions, over **65** Enterprise Product Launches & Growing

Rapid assessments, hands-on bootcamps & embedded coaching to advance adoption of agile and lean principles

Assessments

With InRhythm's unique assesment process, we will come directly to you to uncover what your immediately addressable gaps are.

Bootcamps

Through InRhythm's signature bootcamps, your teams will be empowered to adopt Agile practices and make significant Agile transformation.

Coaching

Our embedded coaching accelerates the adoption of agile & lean principles and their practical application to modern software engineering.

Our success is in our stories

Goal:

A responsive web application that would embed in car dealers current site. This app would enable the user to check their credit score and value their trade in easy steps.

Impact:

- Product envisioning and design
- Establish Agile practice, build cross-functional, high Velocity teams that consistently release new features
- Sustainable cultural change and Agile transformation across company

Goal:

To help a print company make digital transformation by building a cross-functional, High-Velocity team that has extreme customer focus. This would enable the team to realign the digital platform around various product lines.

Impact:

- Mobile app under 90 days - 1st time in company history
- Major release every 90 days or less - post coaching
- Electronics app in 47 working days

Goal:

A platform redesign and rapid rollout that would overcome a failed MVP launch, deep technical debt and a 5 CTO turnover in under 2 years

Impact:

- 4 coaches over 11 months coached and partnered with 300 employees within the company
- Established clear independent business units
- Reduced time to market from 9 months to every 30 days
